## Environmental Compliance Services

10045 Springfield Pike, Suite #7, Cincinnati, OH 45215 513-825-2885 [www.theessinc.com](http://www.theessinc.com)

### First in Class Safety Culture

#### Air Management

Environmental and Safety Solutions, Inc., (ESS) has provided numerous clients with air management services for Major and Minor Sources, Title V, as well as non-permitted facilities. The ESS goal is to help industries achieve a cost effective solution to their air management problems, while providing technical support to their internal staff. ESS Air Management support services include the following:

- Compliance Evaluations and Monitoring
- Emissions Calculations for air permit determination
- Stack Test Coordination
- Emissions Inventory Completion
- Annual Compliance Reporting

#### Environmental Site Assessment

An Environmental Site Assessment (ESA) is essential to reduce liability during the property transaction process, and reduces the risk of purchasing a property that has past regulatory actions or industrial process contamination. ESS will perform a Phase-I Environmental Site Assessment (ESA) according to the American Society for Testing & Materials (ASTM) standard E1527, to provide a defense if future contamination is found.

#### Waste Management

ESS has successfully implemented Hazardous and Universal Waste Management programs at several facilities. These programs have included developing waste area inspection checklists, Drum, Container & Materials Management Plan,

Recycling & Waste Minimization Plan, and Standard Operating Procedures for solid waste management.

Hazardous and Universal Waste Training courses are presented to your employees to ensure that employees know and understand the requirements for handling and proper disposal of these wastes.

#### Water Management

ESS provides comprehensive water management services including the following:

- National Pollutant Discharge Elimination System (NPDES) permitting assistance
- Storm Water Pollution Prevention Plan (SWPPP) development
- Ground Water Protection Plan (GWPP) development
- Spill Prevention Control and Countermeasures (SPCC) Plan development

ESS conducts a careful analysis of site processes and current water flow conditions to ensure best management practices are implemented. We can assist with data collection, document management, water sampling and developing operating procedures to reduce overall water usage and eliminate unnecessary discharges.
