First in Class Safety Culture

Environmental and Safety Solutions, Inc. (ESS) can guide the Environmental Health and Safety (EH&S) process as it pertains to the wastewater treatment and water treatment and distribution process. We provide our clients focused, clearly defined solutions to their EH&S issues through creation of or

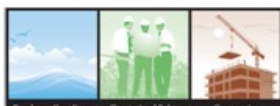

the management and implementation of EH&S processes and procedures. We can relieve the burden of EH&S Supervision, Training, Permitting, Documentation, and Certification so you can focus on the primary mission of treating waste water or preparing water for distribution to households and businesses and be confident that the work is being performed safely, sustainably, and in compliance with the Occupational Safety and Health Administration (OSHA) and the Environmental Protection Agency (EPA).

Our EH&S staff has assisted many different wastewater treatment and water treatment sites over the years with all levels of their operations. We have managed their EH&S related tasks, such as: Risk Identification and Mitigation, Documentation Preparation and/or

Review, Facility Audits, Incident/Accident Investigations, EH&S Plan creation/edit/review, Sustainability Solutions, Site Safety Professionals, Representation before compliance agencies, such as the EPA and Ohio's Public Employment Risk Reduction Program and offer meaningful Training in all EH&S related capacities.

The Metropolitan Sewer District of Greater Cincinnati (Join Utility) utilizes ESS as their on-site EH&S Manager for the past several years. This multi-site facility servicing the metropolitan population of the Greater Cincinnati area demonstrates the capabilities of the ESS staff and the benefits we bring to the table. (Read the thoughts of the Executive Director of the Metropolitan Sewer District of Greater Cincinnati on the back.) We can do the same for your organization, freeing you of the concerns that your EH&S is being done properly and allowing you to focus on your primary mission.

Re: Environmental & Safety Solutions, Inc. (ESS) Professional Services

Dear:

As the Executive Director of the Metropolitan Sewer District of Greater Cincinnati (MSDCG), I recommend Environmental & Safety Solutions, Inc. (ESS) as a dependable and qualified company specializing in OSHA and EPA compliances. In my role, it is my mission to provide safe and quality water supply to the 800,000 residences in the Greater Cincinnati area and, through the business relationship with ESS, I believe MSDCG is in a better position to provide those services which are expected by our consumers.

ESS provided a comprehensive environmental, safety and health gap analysis for MSDCG in 2012 to explore the effectiveness of our current programs, policies and procedures that were in place to reduce the risks to employees, contractors, the public and, the environment. Their systematic approach reinforced our commitment to protect public health, employee health and safety as well as protect the environment through improving our efforts to implement sustainable water reclamation and watershed management practices.

The team sent by ESS provided a professional, non-invasive assessment that culminated in a robust report that guided MSDCG in developing a proactive strategic plan to strengthen our current systems. Partnering with ESS's on-site staff, MSDCG is confident that our programs, policies and, procedures will become best in class and set industry standards for employee safety and environmental protection in the water and sewer systems business.

I highly recommend working with Mr. Lonnie Grayson, ESS's President, and his team of experts. Through this collaboration, we have developed a wonderful working partnership that will enhance MSDCG commitment to provide exceptional service to our community as well as protect our employees and the environment.

Sincerely,

A handwritten signature in black ink that reads 'James A. Parrott'. The signature is fluid and cursive, with the first name 'James' being the most prominent.

James A. Parrott

Executive Director
Metropolitan Sewer District of Greater Cincinnati
